 JJ,

Statoil is still waiting on ODNR approval of our Eisenbarth pad sampling plan. We have recently updated the plan to include acetone sampling. Hopefully, Statoil will soon receive approval to proceed. On a related note, I need to understand your below comment about the "USEPA is still interested in overseeing this work". If you plan on providing project oversight, I will need to communicate this to the ODNR. Please give me a call so we can discuss.

Mr. Justice,

Thank you for your update. The pad-site sampling plan is still under review by the ODNR. They have requested access to all previous sampling data. That information is be provided to them today. I am uncertain as to when plan approval will be received. I will inform you when the plan is approved and prior to beginning any sampling or remediation operations. Are you or someone else from the USEPA planning on being present during this activity?

**Subject:** Quick Note and Question

Good Morning Mr. Tink,

I just wanted to touch base with you on the Work Plan submittal for the AOC and to get an idea on Statoil's current plans/schedule to work at the Eisenbarth Pad.

First, I had previously stated that I had hoped to have a call and comments back this week but I have been on a mercury spill in Michigan since last Friday and getting all the paperwork for that together as it is still not complete and trying to hand it off to a colleague. So it might not be till next week. Sorry for not letting you know sooner.

Second, any word on sampling and/or further cleanup efforts on the well pad. USEPA is still interested in overseeing this work and if you could please let me know when any additional sampling efforts or cleanup activities take place with a couple day's notice, it would be much appreciated.

Please let me know if you have any questions or concerns.

Thank you,

JJ Justice
